PROJECTS

Online compiler API (Flask)

Dec 2021

My friend and I made an online compiler with which supports C, C++, Python and Java. I was responsible for creating an API from scratch using Flask.

Windows 95 simulator (HTML, CSS, JS)

Aug 2022

I made this website, because I like to challenge myself and I didn't want a simple and ordinary portfolio.

Android games (Unity 3D)

2019 - present

I started learning programming with game development, since then I've created some android games and published them on Google Play.
